***Allowable Subject Matter***

1. Claims 2-6, 8-11, 18-21, 23-27 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

Applicant has cancelled claims 1, 7, 12-17, 22, 28-32 and amended claims 2-6, 8-11, 18-21, 23-26 in accordance with the office action dated 03/30/07. Upon further consideration and comparison with prior art of record (closest reference, Jitsukawa et al. – US 2003/0012267), claims 2-6, 8-11, 18-21, 23-26 are allowed. Particularly, prior art of record, taken individually or collectively, fails to fairly teach method and apparatus for joint searching and channel estimation, as claimed, including “wherein in performing the calculation the correlator is configured to consider plural possible frequencies of complex values along the antenna index and plural possible frequencies of complex values along the pilot set index, plural possible frequencies of complex values along the antenna index corresponding to plural possible directions of arrival and being represented by a frequency index  $n_1$ , the plural possible frequencies of complex values along the antenna index corresponding to plural possible doppler shifts and being represented by a frequency index  $n_2$ , and wherein for each combination of plural possible direction of arrival frequencies, plural possible doppler frequencies, and plural time indexes, the correlator is configured to calculate:

$$Y(n_1, n_2, t) = \text{FFT}(n_1, n_2, X(:, :, t))$$

wherein  $t$  is the sampling window time index;  $X(:, :, t)$  is the complex antenna matrix

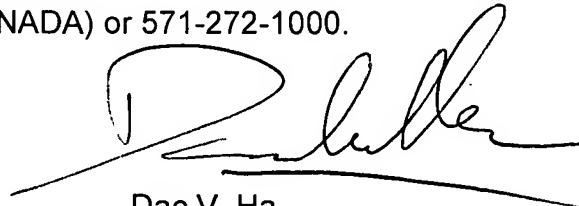

Art Unit: 2611

(with the colon ":" representing all antenna indexes for one sampling window time index)" in independent claims 8 and 23 (claims 2-6, 9-11, 18-21, 24-26 depend therefrom. Thus, claims 2-6, 8-11, 18-21, 23-27 are found to be novel and unobvious over prior art of record.
